Health and Safety Statement

South Hams District Council and West Devon Borough Council are fully committed to ensuring a high standard of health and safety. The Councils recognise their statutory duties protect the health, safety and welfare of staff and others connected to our work activities. We recognise the potential strategic, operational and financial risks associated with failures in health and safety and the importance of maintaining a well-resourced internal health and safety service.

During the last year we have all seen the importance of keeping the workforce safe whilst working in difficult and uncertain conditions. The Health and Safety of our staff has been a priority while tackling the COVID-19 pandemic.

To demonstrate our commitment to health and safety we annually update the health and safety policy statement and have developed a health and safety improvement programme to continue the cycle of continuous improvement by reviewing and updating the health and safety procedures related to the work that we do. This statement, and the associated management systems detail how South Hams District Council and West Devon Borough Council will manage our health and safety responsibilities and deal with any incidents that may occur.

It will be the responsibility of the Councils' Senior Leadership team (SLT) to monitor the implementation of this policy and the councils' overall risk management performance. This will be achieved through the use of regular reporting commissioned by SLT and annual audits.

The Risk Management Group will be responsible for ensuring the work programme is delivered. They will champion health and safety compliance within the Community of Practice business areas.

The organisations have identified that technical expertise for health and safety will be provided by the Environmental Health Community of Practice. They provide advice and support to the organisation as necessary.

We expect all staff to take reasonable steps to be aware of the policy, risk assessments, and the controls identified. To support the Heads of Practice in assessing risks, implementing controls, and to actively engage in any training, exercises or workshops will arranged to test the organisation's effectiveness.

Members are required to make themselves aware of the health and safety arrangements that are likely to effect them.

The Councils are committed to ensuring that the internal health and safety service is adequately resourced to enable the full implementation of this policy. This commitment includes the provision of sufficient financial resources, management and employee time, training and advisory support. The Council has appointed a competent person to provide competent health and safety advice to the Councils.

This Health and Safety arrangements will be reviewed at least annually or more frequently where there have been significant changes to the Councils or factors affecting the Councils' activities.

The aims, objectives and three-year safety plan set out the Councils' commitment to provide a healthy and safe environment for all those who work in and visit the Councils. The plan reflects best practice and is based on the principles of loss control and quality management.

This approach is designed to:

monotonous work and work at a predetermined work-rate and to reducing their effect on health;

- adapting to technical progress;
- replacing the dangerous by the non-dangerous or the less dangerous;
- developing a coherent overall prevention policy which covers technology, organisation of work, working conditions, social relationships and the influence of factors relating to the working environment;
- giving collective protective measures priority over individual protective measures; and
- giving appropriate training and instructions to employees.

5.3 Codes of Practice

5.3.1 Where a need is identified, through legislation, risk assessments, best practice, health and safety auditing, the proceedings of committees or other means, a Code of Practice will be established to set the standard of implementation and operation for the identified topic. These Codes of Practice will be reviewed as and when legislation changes or practice dictates.

5.3.2 The Codes of Practice shall have the same status as the main policy document and will outline how to implement the requirements of the main policy in specific risk areas.

5.4 Training

- the risks to the health and safety of others who may be affected by their activities,

for the purpose of identifying the measures necessary to ensure a safe and healthy place of work.

5.5.2 In addition to the general risk assessment set out at paragraph 5.5.1 there may also be a need for a specific risk assessment and the need for that should be identified and if possible carried out at the same time. These specific assessments are shown in the appropriate Code of Practice on Assessment of Risk but include:

- manual handling ((including the lifting, putting down, pushing, pulling, carrying or moving of a load));

5.5.4 Managers/supervisors are to monitor work activities to ensure that risk assessments and control measures are still suitable and sufficient and take appropriate action to review when necessary.

5.5.5 Where a need for a generic risk assessment is identified (e.g. work in offices, activities of a similar nature taking place in more than one service) the internal health and safety service will be responsible for carrying out the assessment and monitoring as required by paragraph 5.5.4

5.6 Health and safety standards, audit and inspection

which will be reported in their service plan. The standards are shown at **Appendix C.**

5.6.2 The Internal Health and Safety Service CoP will develop a programme of audits and a standardised form to identify whether the management of risk has been carried out in each service area. The programme should be designed to reflect the needs of the Councils and the individual Service and will take into account the particular kinds of hazard or health and safety issues encountered. The timing of health and safety audits will appear in the annual safety plan and will be proportionate to the level and scope of the hazards and risks present.

5.6.3 The combination of the review of safety standards and the audit process is designed to ensure that we can demonstrate our level of health and safety management. The results will be analysed, considered, prioritised and shaped into an action programme.
